

AIM: To Create a simple cloud software application for hospital management system and provide it as a service using any Cloud Service Provider to demonstrate Software as a Service (SaaS).

Procedure:

1. Open zoho.com and create a account in it
2. Sign in for zoho
3. Open zoho creator
4. Click on access to zoho creator
5. Click on create application
6. Enter the name of application
7. Enter some credentials
8. Then choose the requirements(e.g.,name,age..etc)
9. Once everthing is done click on access development
10. Enter the details what the page is asking
11. Result is stored

Result:

The screenshot displays a web application titled "Hospital Management System". On the left, a dark sidebar contains a "Patients" menu with a dropdown arrow, a highlighted "patient form" button, and an "All Patients" link. The main content area is titled "patient form" and contains a form with the following fields: "Name" (split into "First Name" with the value "Guniputi" and "Last Name" with the value "Dhanasri"), "Phone number" (with a country code dropdown set to "+91" and the number "2684789749"), "Date" (set to "22-Nov-2025"), and "Weight" (set to "101"). A blue "Submit" button is located at the bottom of the form. The bottom of the sidebar shows a user profile with a blue circle containing the letter "A", the name "ALIGETI AKS...", and icons for a menu, a cross, and a notification bell.
